

Info Paper 03

Suva, Port Vila, 28 May 2020

Pacific Islands GIS and Remote Sensing User Conference

23rd November to 26th November with Workshops 27th November

Vanuatu and PGRSC do not negate the danger of COVID-19, however, we assume:

- i. That by end of November the regional airlines including Australia and New Zealand would operate again and
- ii. Quarantine measures would be reduced between countries in which COVID-19 cases are under control.

We will guarantee all safety measures made mandatory still necessary at that point in time in social distancing, hygienic practising of washing hands and using hand sanitiser's and wearing protective masks, etc.

With the two statements mentioned we wish to announce that the Pacific Islands GIS and Remote Sensing User Conference is to take place as planned before in **Port Vila from 23rd November to 26th November with workshops on 27th November.**

These announcements will be made through all GIS and RS related event calendars.

So far we plan the Conference as "normal" Conference and not as video meeting.

We fervently hope COVID-19 restrictions would ease and allow PGRSC Conference 2020 plans to continue with high participation as travel funds are often not utilised this year.

Best regards,

Arthur Ferua
