[Direct GPS Measurement of Koyna Dam Deformation during Earthquake](#)

N. Radhakrishnan

[Monitoring the Behaviour of Very Tall Structures under the Action of Non-uniform Sunlight. The Case of a 350 m High Chimneystack From Baia Mare, Romania](#)

G.M. Radulescu, A.T.G. Radulescu

[Enhanced Kinematic Positioning Methods by Shaping Filter Augmentation](#)

K. Ramm

[GPS Deflection Monitoring of the West Gate Bridge](#)

N. Raziq, P. Collier

[Monitoring Deflection of Vertical Surfaces Using GPS](#)

N. Raziq, P. Collier

[Object Monitoring/Reconstruction with Automated Image-based Measurement Systems](#)

A. Reiterer

[Calibration of Terrestrial Laser Scanners for the Purposes of Geodetic Engineering](#)

Y. Reshetyuk

[A Multi-Sensor Personal Positioning System for Combined Indoor/Outdoor Environments](#)

G. Retscher, M. Thienelt

**From Idea to Reality: The Case Study of a New Deformation Monitoring Technology**

Chris Rizos

**Deflection Monitoring and Frequency Analysis of the Forth Road Bridge using GPS**

G.W. Roberts, C.J. Brown, X. Meng

**Integration of gps and pseudolites – effect on height determination accuracy**

Z. Rzepecka, A. Wasilewski, S. Cellmer, J. Rapiński

**[Back to Contents](#)**
