- Control of land use and land development

Administering the people to land relationship through

- Land Policy
 - Land Management
 - Good Governance
- and
- Building the capacity to deal with this

A Global Land Management Perspective

A Global Land Management Perspective. Stig Enemark, April 2004.

It is all about:

- **People**
Human rights, engagement and dignity
- **Politics**
Land policies and good governance
- **Places**
Shelter, land rights and natural resources

The role of FIG

- FIG should identify its role in achieving the MDGs and spell out the areas where the global surveying profession can make a significant contribution.
- Issues such as tenure security, pro-poor land management, and good governance in land administration are all key issues to be advocated in the process of reaching the goals.
- Measures such as capacity assessment, institutional development and human resource development are all key tools.

...The role of FIG

- FIG will work closely with the UN agencies and especially the World Bank in merging our efforts of contributing to the implementation of the MDGs.
- FIG is committed to the UN-Habitat agenda on Global Land Tool Network for pro-poor land management.
- FIG contributes to UNDP, FAO, UNEP projects related to urban/rural interrelationship and environmental sustainability.

It is all about:

People, Politics and Places - and Power

The future belongs to our children
